1 October 1969

MEMORANDUM FOR THE RECORD

SUBJECT: Silver Recovery

1. On 1 October 1969 a demonstration of the [] Film Destruction and Silver Recovery System was made to all interested parties. Following the demonstration a meeting was convened in the Beige Room to discuss the safety aspects and acceptability of the system as installed. In attendance were:

25X1

2. After considerable discussion concerning the safety aspects of the system as presently installed, [] said he would consider signing a concurrence memo which would allow operation of the system if the following parameters were met:

- a. Install a drain for the safety shower.
- b. Remove the incinerator and blower system.
- c. Relieve the double decking (wt section).
- d. Interlock the Somat and Silver Recovery System so as to prevent simultaneous operation.
- e. Cage the Somat door.
- f. Cage access ladder.
- g. Apply a non-skid floor surface.
- h. Make available head-hoods and rubber aprons.
- i. Install an operable exhaust fan in the room.

3. Operation of the system is now dependent upon meeting the above factors. [] will furnish cost and time estimates and from this a decision will be required as to whether to go ahead with the modifications [], probably making the present location a permanent one, or to suspend operation until the new Somat room is completed (6-10 months), then relocating the Silver Recovery System in that room
